ANSWER APEX ROOST DEFLECTOR

Our premium Apex roost deflector is easily the best-fitting roost deflector on the market highlighted by a hinged back that allows the unit to "hug" your body in addition to huge amounts of shoulder adjustment and pivot.

- Polycarbonate and polypropylene panels create maximum protection against flying debris
- EVA shoulder foam provides premium impact absorption with maximum comfort
- Pivoting rear lower panel allows deflector to move with and "hug" rider
- 3-position front and back shoulder strap adjusters offer a fine tuned fit
- Will accommodate neck braces

ANSWER NOVA ROOST DEFLECTOR

Our Nova deflector passed the strict European CE certification for protective gear so you can have confidence in this value packed roost deflector model. Details include maximum coverage with maximum ventilation and is totally adjustable to refine the fit.

- Injection molded plastic and biofoam trim provides maximum protection against flying debris
- 3 position front and back shoulder strap adjusters offer a fine tuned fit
- Arched back with vertical spine ridge protects and conforms to natural riding position
- Plastic arm panels feature elastic straps and can be removed

ANSWER STONE SPRAY SHIELD

Our Stone Spray Shield under-jersey roost protection is for riders that prefer a lightweight, flexible roost deflector over the more formidable feel of plastic deflectors.

- Use of stretch and moisture wicking fabrics provide superior fit and comfort
- Maximum ventilation without sacrificing coverage for roost protection
- Impact-absorbing foam design covers clavicle and shoulder area

MSR® D30® HIP PADS

- Compatible with all MSR® pants
- D30® intelligent shock absorption is a patented shock absorbing material engineered with intelligent molecules
- D30® is a rate-sensitive material, meaning when moved slowly the molecules flow freely, making it soft and flexible
- At high speeds (like an impact) the molecules lock together, making the material an excellent shock absorber
- The whole process is repeatable, occurs instantly and returns to its original state as soon as the impact is over

ANSWER ALPHA KNEE GUARD

Engineered to feature a full floating, self-centering knee that stays centered over knee cap, even on long motos! The perforated PE foam with Airprene® padded straps provide a plush layer of comfort between the plastic shield and the rider's leg.

- Polypropylene thigh, shin and nylon knee cup leave no exposed knee area to optimize impact performance.
- 3 'set and forget' adjustable straps with quick-lock fasteners adjust for wide range sizes.
- Totally washable with removable comfort padding is perforated for breathability.
- Straps are padded at the back of the leg for comfort and position retention
- One adult size fits most

01-8245 $69.95

MSR® REFLEX KNEE/SHIN GUARDS

- 3 adjustable elastic straps combined with Airprene® panels provide a positive fit, keep you cool and comfortable
- Adjust the "set and forget" Velcro® straps just once, then you can use the 3 speed buckles to install within seconds
- Self-centering knee allows the Reflex to float around your knee cap suspended by a layer of cool perforated foam
- A high-impact polycarbonate shin, an ultra tough nylon knee and polypropylene thigh provide optimum coverage and maximum range of movement without leaving exposed areas
- Upper and lower panels are fully louvered for maximum cooling
- Flush flat head pivot screws help reduce wear
- One size fits most

33-0084 $64.95

- Harder, heavy duty black pucks-denser POM plastic, weigh 9 oz. ea. Longer lasting

Description	P/N	Retail
Heavy Duty Black Slider Set	19-7991	$29.95

EVS TECHNOLOGY FEATURES:

Strut Compression System: made of reinforced carbon fiber, advanced lateral structural rigidity, offers further peace of mind

Dual Defense: total tracking knee cup for full time knee protection, knee cup tracks along a full length guide strap

Tru-Motion 2.0: anatomically correct hinges, track natural knee movement and reduces migration, adjustable hyperextension lock-outs

ClickTec: quick release buckle system, fully adjustable for easy strap adjustment, adjust once, get in and out fast

Perfect FormFit Frame: frame forms to all leg contours, lightweight and impact resistant injection molded shell

ComfortDry Liner: Dry-Suede ultra breathable liner keeps you cool and dry, removable/washable for easy maintenance, 3 compression straps ensure a solid secure fit

EVS Tru-Motion 2.0: patented EVS Tru-Motion 2.0 hinge (TM5+) enables the RS8 PRO to stay suspended on the leg in the intended position during the full range of motion with the natural roll and glide movement that mimics the natural arthokinematics of the knee. If a brace has migrated down the leg and the hinges are not aligned with the medial and lateral condyles of the knee - midline, hyperextension cannot be controlled effectively and injury can occur; the TM5+ hinges and RS8 PRO are designed to reduce the risk of that occurring.

EVS WEB PRO KNEE BRACE NEW

The latest evolution in our premium knee brace delivers a sleek, ultra lightweight low profile carbon composite frame. Designed with an anatomically engineered fit and the proven Tru-Motion 2.0 hinges. Also comes equipped with a dual defense knee cup system and offers a fully modular design.

- Ultra-lite: Lightweight and durable carbon fiber construction
- Perfect FormFit Frame: Lightweight injection molded frame provides impact protection and knee stabilization
- Dual Defense total tracking knee cup design: Full protection at all times
- Tru-Motion 2.0 anatomically correct hinges: Keeps the brace in place no matter how much you ride
- Adjustable hyperextension lock-outs allow personalized fitment
- Modularity: Straps, D-rings, knee cups and liners are all removable and replaceable
- Thermo Fit Liner. Molds to your leg for a customized fit

EVS SC06 KNEE GUARDS NEW

Whether you ride motocross, hit trails on your mountain bike or drop in at your local BMX track, the SC06 is your complete 2-wheel knee/shin guard. Designed as a multi-sport knee/shin guard, the perforated neoprene construction along with a molded bio-foam upper delivers a comfortable form fit along with impact protection. The SC06 also features an injected molded knee cup and shin guard to protect from big hits and pedal bites. The SC06 also incorporates a pre-curved "race shape" and compression comfort cuff to reduce migration.

The newly designed SC06 is your preferred knee shin guard for all your 2-wheeled activities

- Injection molded knee cup for increased patella protection
- Injection molded shin guard
- Dual wrap around upper and lower calf strapping system
- Molded bio-foam upper for increased impact absorption
- Compression comfort cuff reduces migration
- Breathable perforated neoprene construction
- Moisture wicking liner
- Great multi-sport knee/shin guard

EVS R4 PRO RACE COLLAR

NEW

- We took our proven race collar technology and stepped it up to the next level. The new R4 Pro improves upon existing lightweight feel and incredible fit by incorporating the use of carbon fiber, high impact injection grade bio-foam and an all new innovative air bladder shock absorption system. In addition, we improved the harnessing system by providing an all new bi-lateral torso strapping system.
- Minimizes risk of axial compression, hyperflexion, hyperextension and lateral hyperflexion
- Easy front entry system
- Provides amazing range of motion of head
- Soft rubberized edges for increased comfort
- Adjustable sizing
- Works well with most chest protectors
- Ultra lightweight and low profile
- Weight: Adult = 585 grams
  Youth = 336 grams

R4 PRO SIZING CHART

Youth: Under 105 lbs. Under 5'3"	Adult: 105 lbs. + 5'3" +

Rapid Lock Front Closure
- Makes getting in and out of the collar fast, easy and safe

Carbon Fiber Top Cap
- Absorbs and disperses energy to the bio-foam and air bladder system

Integrated Air Bladder Shock Absorbing
- Eases the tension on shoulders/spine when faced with direct impact from helmet
- Deflects and absorbs the impact energy through a deformation that uses energy, while also dispersing energy, thereby evening out the forces across the body naturally

Adjustable Rear Strut
- Offers adjustments of 10°-12° between pin locations for a more customized fit

Rear Axial Load Absorber "Tail"
- Transfers impact energy across width of shoulders instead of blunt force to spine

Bio-Foam Liner
- Serves as an extra layer of absorption while offering added comfort
- Removable/washable

Bi-lateral Torso Strapping System (X-Strap Harness)
- Ensures a safe, secure fit throughout the entire duration of your ride

ATLAS CARBON NECK BRACE

- Nothing says high performance quite like carbon fiber. Carbon construction offers the ultimate strength to weight ratio, and it is beautifully crafted into our high end brace.Each layer is hand laid precisely into each mold by skilled craftsman, then cured, sanded, and finished all by hand. Each brace is truly a work of art.
- Flexible "leaf spring" style suspension allows the chest supports to aid in absorbing and slowing down Hyper-Flexion impacts.This promotes further rotation of the helmet, helping to keep the body in motion rather than the head coming to a harsh, abrupt stop on impact
- Reversible rear mounts offer multiple offsets to adjust for chest size, and create a custom fit. Adjustment expands the life span adjusting as your body grows
- The Carbon weighs in with the featherweights at 635g (1.4 lbs). With a low weight, long term fatigue is reduced and the user experience is greatly improved. In case of emergency, the brace features a unique emergency release system (ERS). By pushing a small lever, a user can exit the brace with ease in seconds.

Mounting Options:

- Full chest strap (included)
- Under the arms cross straps (included)
- Stand alone brace with chest protector
- Chest protector mounted to brace (see user manual for mounting instructions)

Sizing:

- Sm Brace: 33" - 36" (84cm - 92cm)
- Md Brace: 37" - 41" (94cm - 104cm)

Note: Chest circumference is measured high on the chest, right below the arms.

In the Box:

- 2 strap systems
- 1 hard shell brace bag
- 1 optional shoulder padding kit (for height adjustment)
- Multi-language user manual

Fitting Guidelines:

Optimal brace fitment is achieved by selecting the correct rear mount offset, and opting to use (or not use) the optional shoulder padding for height adjustment that suits your body and range-of-motion of your head/neck, as described in the Atlas Brace™ user manual.

While fitting a brace, there are 2 key steps to follow for length and height adjustment.

1. While standing straight up, the brace should fit snug on your chest and back, and the shoulder padding should be resting on your body. If the shoulder padding does not rest flush on the body, there will be a gap between the shoulder padding and the body. This shows the brace is too tight on the chest and the rear mounts supplied on the brace should be reversed to change the offset, this will add length to the brace to create a better fit, allowing the shoulder padding to rest on the body as it should.

2. Once the brace is properly fitted for your chest size, determine which height setting is right for your individual body type and neck length so that you will have proper range-of-motion before starting activity. Put on a helmet to determine which setting is right for you, and if you do not feel your range-of-motion is sufficient, remove the optional shoulder padding from your Atlas Brace™ by pulling down on the outer edge of the bottom shoulder pad. The padding will simply "pop" out of the top shoulder pad. Repeat for the opposite side. Make sure the brace still fits snug on the body, and the shoulder padding is resting on your shoulders.

ATLAS ORIGINAL NECK BRACE NEW

The Atlas Original combines simplicity and sophistication like no other. Minimalistic design, simplified operation, easy adjustment, extreme comfort. By updating features with parts developed for our Carbon Brace, we significantly reduced the overall weight to 750g (1.65 Lbs). Simplicity was increased with reversible rear mounts, and adding our fool-proof strap clip system to the frames.

- Flexible "leaf spring" style suspension allows the chest supports to aid in absorbing and slowing down Hyper-Flexion impacts. This promotes further rotation of the helmet, helping to keep the body in motion rather than the head coming to a harsh, abrupt stop on impact
- The new Original tips the scales at a lean 750g (1.6 lbs). By reducing the weight, long term fatigue is reduced and the user experience is greatly improved
- In case of emergency, the brace features a unique emergency release system (ERS). By removing a pin and nut, a user can exit the brace with ease in seconds.
- CE certified
- Weight: 750g (1.65 lbs)

Sizing:

- Sm Brace: 33" - 36" (84cm - 92cm)
- Md Brace: 37" - 41" (94cm - 104cm)

ATLAS PRODIGY NECK BRACE

The Atlas Prodigy is purposely built as a stepping stone for that "in-between sizes" young growing body type, and is a perfect solution for smaller women also.The Prodigy still preserves the innovative features of its bigger counterparts.

- Flex, adjustability, chest suspension, dual chest and back supports, strap systems all built right in.
- Flexible "leaf spring" style suspension allows the chest supports to aid in absorbing and slowing down Hyper-Flexion impacts.This promotes further rotation of the helmet, helping to keep the body in motion rather than the head coming to a harsh, abrupt stop on impact
- Reversible rear mounts offer multiple offsets to adjust for chest size, and create a custom fit
- Adjustment expands the life span adjusting as your body grows.At 590g (1.3 lbs) the Prodigy is virtually unnoticeable during use.
- With the push of a button, a user can exit the brace easily with no loose parts to fall away.This quick release system can be performed in seconds by a person of virtually any age

Mounting Options:

- Stand alone brace with no straps
- Full 3 piece chest strap (included)
- Under the arms cross straps (included)
- Stand alone brace with chest protector
- Chest protector mounted to brace (see user manual for mounting instructions)

Sizing:

- Women's: 29" - 33" (74cm - 84cm)

Note: Chest circumference is measured high on the chest, right below the arms.

In the Box:

- 2 strap systems
- 1 draw string brace bag
- Multi-language user manual

ATLAS TYKE NECK BRACE

Extreme sports require agility and mobility, even if you're 5 years old. Bulky hand-me-downs can be dangerous and limit critical body movements necessary to safely perform extreme sports. The Atlas Tyke is designed specifically, and proportionately for this reason. The Atlas Tyke fits a small child just like an adult brace fits a full size adult. Even though the product is miniature, it still preserves the innovative features of its bigger counterparts.

- Flexible "leaf spring" style suspension allows the chest supports to aid in absorbing and slowing down Hyper-Flexion impacts.This promotes further rotation of the helmet, helping to keep the body in motion rather than the head coming to a harsh, abrupt stop on impact
- Reversible rear mounts offer multiple offsets to adjust for chest size, and create a custom fit
- Adjustment expands the life span adjusting as your body grows
- At 490g (1.1 lbs) the Tyke brace is incredibly lightweight. So light, your children may even forget they are wearing it!
- With the push of a button, a user can exit the brace easily with no loose parts to fall away. This quick release system can be performed in seconds by a person of virtually any age

Mounting Options:

- Stand alone brace with no straps
- Full 3 piece chest strap (included)
- Stand alone brace with chest protector
- Chest protector mounted to brace (see user manual for mounting instructions)

Sizing:

- Youth: 24" - 28" (61cm - 71cm)

Note: Chest circumference is measured high on the chest, right below the arms.

In the Box:

- 1 chest strap system
- 1 draw string brace bag
- Multi-language user manual

ANSWER EVAPORATOR SHIRTS

- Spun fabric construction with wicking and anti-bacterial treatments creates a reactive moisture transfer system that keeps the body cooler and dryer than cotton
- After 60 minutes of exercise the Evaporator fabric releases 80% of it's moisture after 30 minutes of rest. Cotton releases only 40% of it's moisture after the same amount of time
- Inner layer contains fibers that will wick the moisture off skin quicker, creating a cooler interior climate. Once moisture is separated from your skin, the outer layer will evaporate the moisture fast and evenly

EVS CORE TEMPERATURE REGULATOR VEST (CTRV) COOLING VEST

Keeping your inner temperature as low as possible during extreme fitness is always challenging.

- Constructed of thin, strategically placed layers of "Super Absorbent Polymer"
- Once saturated with water, polymer retains and slowly disperses to keep you cool
- Strategic sections will keep your core temperature down longer
- Helps to maximize your riding session
